

IN BRIEF

You are extending your activity abroad ?

Companies have to be close to their customers. This is the reason it is highly recommended to use IDN.

IDN are the way to promote every identities. More than half of the inhabitants of the earth use another alphabet than ASCII. IDN should not be disregarded.

ACCENTED DOMAIN NAMES

WHAT IS IDN ?

An Internationalised Domain Name is a domain name that can contain characters not defined by the ASCII standard. These characters include most of the accented letters used in different European languages and other characters that are not found in the Latin alphabet.

REGISTERING ACCENTED DOMAIN NAMES

NETIM allows you to register domain names with all the characters authorised in the following extensions:

	Austria .AT
	Switzerland .CH
	Germany .DE
	Spain .ES
	Europe .EU
	Finland .FI
	Greece .GR
	Hungary .HU
	Lithuania .LT
	Poland .PL
	Portugal .PT
	Sweden .SE
	Slovenia .SI

When passing your order, you can indicate the domain name in its form with accents or as its ACE chain. Our IDN conversion tool (available at the following address : <http://www.netim.com/domain/tools/idn-converter.php>) determines the domain name's encoding in IDN or ACE.

KEYBOARDING

Use our IDN keyboard to facilitate the scripture of accented domain names especially for characters unavailable on your keyboard. Please find the keyboard at the following address : <http://www.netim.com/domain/>
