ES.3.2 The transfer does not take effect immediately. The Client must follow the described procedure and, particularly, must approve the transfer within 10 days on the registry's control panel.

The Domain Name shall be referred to as in "quarantine" status

ES.4.2 If a Domain Name has been disabled with the past forty (40) calendar days, it can be reactivated subject to the following conditions and procedures, and depending on the details provided to NETIM when carrying out these procedures:

- i) restoration is only possible from a technical point of view for the so-called "quarantine" period, which is the forty (40) day period defined above.
- ii) payment for the restoration must be made seven (7) days before the destruction of the Domain Name by the Registry, to enable NETIM to carry out the operation within the time limit. Failing this, the Domain Name cannot be restored and NETIM cannot be held responsible on these grounds.
- iii) the restoration procedure restores the Domain Name's previous parameters (personal and technical information) and extends by one (1) year the duration of the Domain Name's registration starting from the previous expiry date.
